NEXT MEETING

Our next meeting will be Thursday, November 14th at 7:00 PM at the Moose Lodge 75 Washington St. in North Tonawanda. A few of the topics on the agenda for discussion include a review of 2024's club finances with a look to the future as well as planning for the January holiday party and Chinese auction. I hope your starting to look through your stuff to see if there are things you don't need anymore to donate for the Chinese auction. It was a lot of fun last year thanks to wide variety of items we had to auction off as well as the great food.

There will be no December meeting. Our next meeting after November's will be the holiday party in January.

THE FIELD IS PUT AWAY FOR THE SEASON

The club officers took care of winterizing the field on Saturday. It's still open for use as long as the weather permits but only one flight station and barrier are left out. The charging station and batteries have been removed. The porta-potty will get it's final service and be locked for the winter. The field looked great and the corn is gone so get some use out of it before we can't get back there due to weather.

MEMBERSHIP RENEWAL

Dues are due in December. You can bring them to the November meeting if you'd like or send them to our Treasurer:

Al Herrington
6505 Amy Lane
Lockport, NY 14094

It's probably also a good time to check your AMA membership and FAA registration to see when they need to be renewed. Kind of like changing smoke detector batteries when the time changes. This year when I renewed AMA, I changed from the digital version of the magazine to the paper copy. I'll be passing them on to Al when I'm done reading them so he can continue donating them to some of the local libraries with stickers on them with our club information.

INDOOR FLYING OPPORTUNITIES

Indoor flying at the North Amherst Rec Center, 4415 Millersport Hwy.

Dates scheduled so far are:

November 7, 14, 21 at 2:30-5:00 pm. The cost will be \$15 per flier and is open to all fliers with an AMA registration.

Call Paul Schwarz with any questions - (716) 583-2008.

GETTING READY FOR WINTER FLYING

I've got skis on three of my planes to get ready for when we get one of those winter days where there isn't a lot of wind but there's that perfect snow pack. I'll have to find where I put my boots and gloves (will need those for using the snowblower as well).

Floats also can work well. We don't get as much run time from the cold batteries but we have a great time. Don't have to worry about the ankle biting horse flies.

THIS SPACE IS AVAILABLE

Do you have any information that you think your fellow club members would be interested in hearing about? Feel free to put something together and send it to me for inclusion in the newsletter. We have a diverse group with a lot of experience in different aspects of the RC aero-modeling hobby. Share what you know. Tell about a good or bad experience you've had while building or flying.
